

Sehyoung Hamjong

UX / Product / Industrial Designer

Houston, TX | 832-282-5151 | shamjong@gmail.com | www.sehyoung.com

INTRO

Human-centered UX and product designer with 10+ years across enterprise and large-scale digital environments (the last 9 in UX/product), shaping employee- and customer-facing experiences within complex enterprise technology ecosystems. Owns the full design process: user research and usability testing, personas, information architecture, wireframes, and high-fidelity interactive prototypes. Turns research insights into prioritized, actionable design improvements, and communicates design rationale to cross-functional teams and senior stakeholders in Agile/SAFe environments.

EXPERIENCE

Experience Lead, Merkle | Dec 2021 – Jul 2026

Led experience strategy and design on complex, multi-workstream engagements for enterprise clients, owning the experience deliverables end to end and partnering daily with strategy, UI design, and product.

- Led experience strategy for GM Energy's ecommerce ecosystem, a home energy line launched with no prior digital presence, owning journey maps, personas, service blueprints, and end-to-end customer experience for a platform now serving 2.3M+ annual visits. Served as one of two primary UX points of contact through concepting and service mapping.
- Launched the ecommerce experience and established its purchase and checkout flows, carrying eComm 2.0 from MVP through financing launch.
- Built Disney-style storyboards across shopping, checkout, Energy Genie, installation, and an executive dashboard that aligned a 16-person cross-functional team of UX, UI, and product around a single narrative.
- Identified an unmet need no one had scoped and produced a sales guide adopted across the entire GM Energy sales organization, remaining its primary point of contact.
- Designed and independently facilitated a two-day visioning workshop for 20+ T. Rowe Price product owners and managers, owning strategy, agenda, and prep, and turning open ambiguity into a prioritized, actionable feature backlog. Participants noted they covered more ground in two days than they expected to.
- Mentored one to two designers per engagement, provided creative direction, and presented design decisions and research to director and manager level stakeholders.

Product Designer, Shell | Apr 2019 – Dec 2021

Designed data-dense enterprise products in an agile environment for the global chemicals business, with conceptual oversight on direction and strategy, partnering with a product manager and 12 senior developers and embedded with the chemicals-business product owner and SME.

- Designed Shell's Pricing Excellence Tool end to end, from research and journey mapping through wireframes, prototypes, and UI specifications. Now used across the global chemicals business and credited with \$140M in added contract profits.
- Grew weekly active users 186% at first release, with average session duration up 13.5% and shared analyses up 150% week over week.
- Co-led the project kickoff workshop in Rotterdam with a UX lead, UX researcher, and PM, each running a segment and facilitating a breakout group among 15+ international participants.
- Led workshops, interviews, and usability testing with global commercial teams, translating findings into design direction and strategy rather than a list of fixes.
- Turned a highly technical pricing process into an interface commercial teams could read at a glance.

UX Designer, Softway | Aug 2017 – Jan 2019

- Led user experience and strategy across ecommerce, web, mobile, and internal platforms for oil and gas clients.
- Built personas, journey maps, wireframes, and usability tests to validate designs before build, refining concepts through iterative ideation.
- Partnered with development teams through sprint planning and prototyping so intent survived into what shipped.

Industrial Designer, Advent | Feb 2015 – Aug 2017

- Designed custom booths, POS displays, and showcases for exhibitions and commercial spaces, concept through fabrication.
- Moved between designer, director, and engineer roles to hold design intent from first drawing through final build.
- Cut a four-week build process to two weeks, a 50% reduction, by standardizing components across the highest-volume series and tightening communication between design and the shop.

Industrial Designer, Tramontina USA | Jul 2013 – Feb 2015

- Developed new competitive housewares product lines from hand sketching and ideation through 3D surface modeling and high-resolution prototypes.
- Worked alongside designers and engineers on the Product Development team, building prototypes presented to buyers at Walmart, Costco, Target, and Williams Sonoma.

Freelance Designer, Synchrotech | Mar 2013 – Jul 2013

- Consulted on materials and methods for set modeling.
- Prototyped scale and cut-away models and produced AutoCAD drawings with architects.

Design Intern, Protostar Engineering | Summer 2011

- Made SolidWorks adjustments to the USA Olympic skeleton sled against engineered drawings.
- Explored forms to streamline components for manufacturing.

SKILLS

Experience strategy & leadership: Experience strategy, design thinking, systems thinking, holistic design process, workshop design and facilitation, executive presentation and storytelling, design mentorship and team design maturity, stakeholder alignment, influencing without authority, Agile and SAFe ways of working, PI planning

Product & UX design: End-to-end UX, journey mapping, service design and blueprinting, storyboarding, concepting, information architecture, wireframing, prototyping, interaction design, high-fidelity UI and visual design, client design systems, accessibility (WCAG) and inclusive design

Research & evaluation: User research, usability testing, user experience evaluation, persona and empathy modeling, market and user analysis, data-informed design

Industrial design: Concepting, 2D sketching, 3D modeling, human factors, photorealistic rendering, design for manufacture, materials and methods, assembly and mechanical drawings, molding and casting, prototyping

Tools: Figma, FigJam, Figma Make, Miro, Adobe Creative Suite, Claude and AI-assisted design workflows, SolidWorks, KeyShot, Sketchbook Pro

EDUCATION

B.S. Industrial Design, Minor in Architecture

University of Houston, Gerald D. Hines College of Architecture & Design, 2012
